Safe Routes to School Procedures and Operations Manual FY23

Introduction

Safe Routes to School (SRTS) is an international movement that makes it safe, convenient, and fun for students to walk, roll, and bike to school. The Michigan SRTS program is managed by the Michigan Department of Transportation (MDOT) with support provided by the Michigan Fitness Foundation (MFF), and seeks to:

- Enable and encourage students in grades K-8, including those with disabilities, to walk and bicycle to school;
- Make bicycling and walking to school a safer and more appealing transportation choice, thereby encouraging a healthy and active lifestyle from an early age;
- Facilitate the planning, development, and implementation of projects and activities that will improve safety and reduce traffic, fuel consumption, and air pollution in the vicinity of elementary and middle schools;

The Michigan program works to achieve its mission by using the “6 E’s”, Engagement, Education, Encouragement, Evaluation, Engineering, and Equity as guiding principles during the SRTS planning and implementation; and its two grant programs, the Mini-grant program and the Major-grant program.

The Mini-grant is a programming-only grant, to help schools build a culture of walking, biking, and rolling among students. Mini-grants can help a walking school bus program, an incentive program, a remote drop site, bike rodeos, and more. Schools can apply annually for up to \$10,000 each or up to \$100,000 for multiple schools. The application opens each year in January.

The Major-grant is an award to help communities build sidewalks, crosswalks, and other eligible infrastructure improvements that may be needed to make it possible for students to walk, bike, and roll safely to school. There is up to \$220,000 per school available for infrastructure and an additional \$10,000 per school to build programming around your project. The Major-grant requires communities to undergo an in-depth planning process that can take anywhere from six months to a year prior to submitting an application. Application deadlines are on an on-going and rolling basis.

Both grants include non-infrastructure programs, the objectives of which are to:

1. Build awareness, support, and effective implementation of active transportation programs as measured by:
 - a. The number of students who participate throughout the program year
 - b. An increase in the number of adult volunteers assisting with active transportation program activities
 - c. The number of community partners who actively assist with program activities
2. Develop a sustainable active transportation program as measured by:
 - a. Continued active transportation route service participation
 - b. Education beyond the term of the funding award
3. Create innovative programs and activities, as measured by:
 - a. Site visits and regular communication with MFF staff

This manual is meant to be a supplement to all non-infrastructure contracts with the Michigan Fitness Foundation Safe Routes to School Program. Items in this manual will help your community understand program guidelines, invoicing procedures for timely reimbursement, and progress reporting instructions.

Section 5: Programming and Resources

From mini-grants to major-grants, programming is the ongoing project that is a great way to create a comprehensive Safe Routes to School Program. Utilizing several of the 6 E's is a critical component of creating a successful program. This section will provide you with information on those E's and resources to help create robust programs. Applicants and recipients are encouraged to work with their Grant Coordinator to help them tailor a program suitable for their school.

Education:

Planning successful Safe Routes to School (SRTS) education activities requires considering how children and adults learn best. Children benefit from a combination of educational methods such as group activities, hands-on skill building, and discussion. Many of the pedestrian and bicyclist safety skills that children need cannot be taught solely by verbal instruction; they also require practical experience (Tolmie, Foot, & McLaren, 1996; Kearsley, 2005). Hands-on activities such as simulated street crossings and bicycle handling drills provide children with the opportunity to watch and apply safety skills. A parent or instructor walking or bicycling with a child enables the child to learn in a "real world" setting and allows the adult to assess how well the child understands and applies safety skills.

Adults learn best when they feel the topic is relevant to them (Lieb, 1991). SRTS education aims to provide parents with information about how to address barriers to walking and bicycling and how to create and promote safe walking and bicycling behaviors and environments for their children. For example, if vehicles frequently speed near the school, parents may be educated on both how the speed of a vehicle hitting a pedestrian relates to the seriousness of injuries and potential solutions for improving safety.

Encouragement Programs:

Encouragement strategies are about having fun — they generate excitement and interest in walking and bicycling. Special events, mileage clubs, contests, and ongoing activities all provide ways for parents and children to discover, or re-discover, that walking and bicycling are do-able and a lot of fun.

Encouragement activities:

- Can be quick and easy to start
- Can be done with little funding
- Can be organized by parents, students, teachers or community volunteers
- Involve all children, including children with disabilities
- Focus on fun and enjoyment
- Jumpstart a community's interest in walking and bicycling
- Show quick success and generate enthusiasm for other strategies that may require a greater investment of time and resources
- Can foster safe walking, bicycling and physical activity behaviors that will be useful throughout children's lives
- Offer teachable moments to reinforce safe walking and bicycling behaviors

Walking School Bus

A Walking School Bus is a program that involves children walking to school along designated routes, with designated meeting points, a timetable, and a regularly rotated schedule of trained volunteers serving as Walking School Bus leaders. The National Center for Safe Routes to School has produced an online audio/video training program that provides strategies and tips for planning a Walking School Bus program. *The Walking School Bus Program: A Primer and First Steps*, is available online at http://apps.saferoutesinfo.org/training/walking_school_bus.

Safe Routes to School Procedures and Operations Manual FY23

Bike Train/Bike Brigade

Like a Walking School Bus, a Bike Train or Bike Brigade is a group of students riding their bikes to school along a designated route, led by volunteer Bike Train/Bike Brigade leaders. Typically conducted for middle school or upper elementary students, these programs also incorporate lessons on bicycle safety and maintenance.

Corner Captains

Corner Captain Programs involve parents, teachers, neighbors, or other volunteers who are strategically stationed at designated points along established routes to school to keep an eye on the students as they make their way in groups to school.

Mileage Program

Mileage programs encourage walking or biking by tracking trips or distance students travel by active transportation to and from school (intended only for trips between home and school; not programs that keep the students on the school grounds).

Bike Share/Bike Library Program

A Bike Share program can be started to help students who do not own a bicycle get to and from school. Students can "check out" bikes to ride from school to home and back again. Schools who would like to start a bike share program should think about purchasing bike locks and helmets in addition to the bikes. Please note: any steel-based products purchased with SRTS funds must be in accordance with the Buy America Act.

Section 6: Additional Information

Communications & Media:

While communications with schools, parents, and community members is necessary – if you plan to reach out to a broader audience, such as the news media or other statewide audiences, work with MFF first. The contract does provide explicit language on preauthorization of materials used for external audiences:

“Any public relations communications and/or products pertaining to this Contract or the SERVICES hereunder that are intended for an external audience will not be made without prior written approval from MDOT or the Michigan Fitness Foundation, and then only in accordance with explicit instructions from MDOT and the Michigan Fitness Foundation. Examples of public relations communications and/or products may include the following:

- a. Use of MDOT logo or the Michigan Fitness Foundation logo;
- b. Brochures, flyers, invitations, programs, or any other printed materials intended for an external audience;
- c. Postings on social media sites or Web sites;
- d. New or updated video, digital versatile dish (DVD), or video sharing productions;
- e. Exhibits or presentations.”

While this is explicit to say external audience, everyday communication with your communities, partners, and their agents (including using emails, social media, and brochures) is acceptable.

Project Completion and Surveys:

Final invoices and progress reports must be submitted within 30 days of program completion. All fiduciaries must complete a post-survey package prior to submitting a final invoice.

Mini-grant Recipients – please complete a post-grant evaluation.

Major-grant recipients – please complete a full survey package, including parent surveys, student surveys, and travel tallies. As you come closer to the end of your grant, please provide yourself plenty of time to complete the package. For example, if you plan to finish at the end of the school year, think about completing the surveys in the spring.

For questions about the surveys please contact the Operations Coordinator. See Section 7 for contact information.

Last updated July 2, 2018, Reviewed August 14, 2022

In order to be eligible to receive Safe Routes to School (SRTS) non-infrastructure funding, your organization, referred to as Subconsultant, agrees to comply with assurances outlined below.

Part A: Compliance/Legal -

1. Subconsultant will comply with the requirements of the federal Office of Management and Budget (OMB) 2 CFR Part 200 Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, sometimes referred to as OMB Uniform Guidance (UG).
2. Subconsultant agrees to read and follow all program guidance issued by Federal Highways Authority (FHWA), Michigan Department of Transportation (MDOT), or Michigan Fitness Foundation (MFF).
3. Subconsultant will maintain records, including executed subcontracts until the final MDOT audit is completed and all other pending matters are closed.
4. MDOT, FHWA or its representative may inspect, copy, scan or audit the Subconsultant or PRIME records at any reasonable time after giving reasonable notice. Any audit, examination, review, assessment, inspection and/or investigation performed would allow MDOT to make financial adjustments to charges for which Subconsultant has requested reimbursement via an MDOT service contract and require Subconsultant to be directly responsible for any monies owed MDOT.
5. Subconsultant will comply with Title VI Attachment E.
6. Subconsultant will not generate program income from the sale of items purchased with award money or the income total will be deducted from the award total.
7. Subconsultant understands that staff paid with SRTS funds must comply with time and effort documentation and reporting requirements as described in 2 CFR 200 OMB Uniform Guidance (UG).
8. Subconsultant shall be governed by the laws of the State of Michigan and compliant with all applicable Federal laws and regulations, as set forth in the Prime Agreement.
9. The Organization's signature on this Contract constitutes the Organization's certification that to the best of his or her knowledge and belief:
 - a. No federal appropriated funds have been paid or will be paid by or on behalf of the undersigned to any person for influencing or attempting to influence an officer or employee of any federal agency, a member of Congress, an officer or employee of Congress, or an employee of a member of Congress in connection with the awarding of any federal contract, the making of any federal grant, the making of any federal loan, the entering into of any cooperative contract, and the extension, continuation, renewal, amendment, or modification of any federal contract, grant, loan, or cooperative agreement.

Safe Routes to School Procedures and Operations Manual FY23

- b. If any funds other than federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any federal agency, a member of Congress, an officer or employee of Congress, or an employee of a member of Congress in connection with this federal contract, grant, loan, or cooperative agreement, the undersigned will complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by Section 1352, Title 31, U.S. Code. Any person who fails to file the required certification will be subject to a civil penalty of not less than Ten Thousand Dollars (\$10,000.00) and not more than One Hundred Thousand Dollars (\$100,000.00) for each failure.

Part B: Administration -

1. Subconsultant has in place systems for accounting, purchasing, and document management that meet the requirements for administering federally funded programs and function to identify and prevent waste, fraud, and abuse.
2. Subconsultant agrees to submit invoices and progress reports in accordance with the schedule presented in the SRTS Procedures & Operations Manual unless prior written approval is obtained from MFF.
3. Subconsultant agrees to read and follow administrative requirements and meet fiduciary responsibilities as described in the SRTS Procedures and Operations Manual.
4. Subconsultant shall submit within 30 calendar days after the date of completion of the award, all financial, performance, and other reports required by the terms and conditions of the award.
5. Subconsultant agrees that when any contracted services in excess of \$10,000.00 paid with SRTS funds are reasonable and necessary for program implementation, the Subconsultant will obtain quotes from more than one entity, whenever possible, and will maintain records of the procurement process which includes a written description of the scope of work, any deliverables associated with the contract, the time frame for the services, and the total cost. The Subconsultant agrees to pay invoices only upon completion of the work and will maintain all invoices and receipts for the work performed.
6. Subconsultant agrees to inform MFF in advance when the rate of compensation changes for any staff position that is funded through SRTS.

Part C: Media and Communications –

1. News releases pertaining to this Contract or the Services to which it relates will not be made without prior written approval from MDOT, and then only in accordance with explicit instructions from MDOT. News releases made without MDOT's approval will be considered a breach of the Contract, and MDOT may terminate this Contract under the termination provisions of Section 22(b).

Safe Routes to School Procedures and Operations Manual FY23

2. Any public relations communications and/or products pertaining to this Contract or the SERVICES hereunder that are intended for an external audience will not be made without prior written approval from MDOT or the Michigan Fitness Foundation, and then only in accordance with explicit instructions from MDOT and the Michigan Fitness Foundation (MFF).
